

Viraj Kamat

Senior Fullstack Developer (Python)

Dallas, TX | (631) 202-7996 | viraj.kmt@gmail.com | github.com/viraj-kamat | linkedin.com/in/virajkmt

Professional Summary

Senior Fullstack Developer with 10+ years of hands-on experience designing, coding, testing, and debugging scalable web applications, microservices, and cloud platforms. Deep development experience in Python with PyTest unit testing, plus production experience in PHP, JavaScript, and TypeScript on AWS. Proven technical leader: mentoring engineers, monitoring applications in production, and driving cloud migrations that measurably improve stability and cost. Daily practitioner of AI-assisted development, using agentic AI workflows to plan features and accelerate high-quality delivery.

Skills

Languages: Python (PyTest, Pandas, PySpark), PHP, JavaScript (Node.js, Vue, jQuery), TypeScript, Java, SQL, HTML/CSS

Cloud & Infrastructure: AWS (Lambda, IoT Core, DynamoDB, S3, Aurora RDS, ElastiCache, CloudFormation, CDK, CloudWatch), Docker, Kubernetes, Terraform, Linux

Frameworks: Django, Flask, Scrapy, CodeIgniter, Bootstrap, Express, REST APIs, gRPC, Microservices architecture

Databases: MySQL, Aurora RDS, DynamoDB, MongoDB, Elasticsearch, Redis, DB2

Tools & Practices: Git, Jenkins, GitLab CI/CD, Travis CI, PyTest unit testing, automated testing, DataDog, AI-assisted development (GitHub Copilot Agentic AI), code reviews, Agile/Scrum

Experience

The Genie Company | Dallas, TX

Fullstack Engineer, Genie Division | February 2025 – Present

- Architect and design AWS Lambda serverless architecture processing 10,000+ incoming IoT requests at peak, consumed via AWS IoT Core MQTT publish-subscribe messaging
- Build a core TypeScript library with asynchronous methods to process incoming and outgoing requests, persisting device and event data in DynamoDB
- Provision and deploy cloud resources using AWS CloudFormation and AWS CDK for repeatable, maintainable infrastructure
- Practice AI-assisted development daily with GitHub Copilot Agentic AI: querying Confluence knowledge bases for context, planning features in AI plan mode, and generating code modules to cut development time while maintaining quality

Indeed Inc. | Dallas, TX

Software Engineer, Data Science Platforms | January 2022 – July 2024

- Engineered and maintained Indeed's Jupyter Enterprise Gateway platform, enabling 2,000+ users company-wide to run custom Python workloads in Jupyter notebooks
- Developed backend components in Python and Java within a microservices architecture, writing PyTest unit tests to validate Python components
- Architected and executed migration of on-premises application components to AWS, lowering infrastructure costs and improving platform stability by 20–30%
- Created Kubernetes deployment configurations and automated production deployments with Terraform, Jenkins CI/CD, and GitLab CI/CD
- Monitored applications in production using DataDog, AWS CloudWatch, and internal data stores to identify and resolve performance issues

Goldman Sachs | Dallas, TX

Vice President, Consumer Wealth Management | June 2021 – December 2021

- Engineered ETL pipelines in Python, PySpark, and HDFS over consumer and seller-financing datasets, transforming and merging data from Kafka, REST, and FTP sources
- Stored processed datasets in AWS S3 in Avro, Parquet, and CSV formats, enabling downstream strategy teams to perform BI analytics
- Automated builds and deployments through GitLab CI/CD

Wayfair | Remote

Senior Software Engineer, Competitive Intelligence | February 2021 – May 2021

- Engineered Google Shopping scraping bots in Python (Django, Scrapy) with MySQL to capture competitor product pricing, strengthening pricing competitiveness and sales
- Scheduled bot operations with cron and monitored bot performance metrics in DataDog

Persistent Systems | Goa, India

Team Lead (IBM Contractor) | August 2014 – August 2019

- Technical lead for IBM's largest blockchain-based billing platform, enabling immutable, transparent storage of billing transactions
- Developed backend components in Python, PHP, and JavaScript (Node.js) within a microservices architecture, processing transactions with scheduled jobs; deployed via Kubernetes/Docker to IBM Bluemix cloud
- Onboarded and mentored 4 junior engineers: delegating tasks, reviewing code, and conducting quarterly performance reviews
- Built responsive frontend user interfaces with HTML/CSS, Bootstrap, and JavaScript

Quagnitia Systems Pvt Ltd | Goa, India

Software Engineer | November 2012 – July 2014

- Developed full-stack PHP web applications on the LAMP stack (CodeIgniter, Joomla, WordPress) with MySQL and HTML/CSS/JavaScript frontends, translating overseas client requirements into technical designs

Demerg Systems India | Goa, India

Software Engineer | February 2011 – November 2012

- Built PHP/MySQL web portals for the Governments of Goa and India using MVC design patterns, securing applications against CSRF, XSS, and SQL injection vulnerabilities and meeting accessibility standards

Education

Master of Science, Computer & Information Sciences (Concentration: Data Science), 2020 — The State University of New York at Stony Brook

Bachelor of Engineering, Computer Engineering, 2009 — Goa Engineering College
